

Just Hungry System Design Diagram

- Requests to update: after each update request, the primary server propagates a backup of its current state (active_orders, product_inventory) to all active replicas
 - USER_DETAILS, PLACE_ORDER, CANCEL
- Requests to retrieve existing content:
 - PRODUCT_LIST, ORDER_COST, VIEW_ORDERS, VIEW_ACTIVE

See source code documentation (readme.md) for a detailed summary of each request type, as well as in-depth explanation of system functionalities in user.py, client.py, and server.py.
